

Lexi v0.02 Walkthrough

This update takes us through Day3. That may not seem like much, but there are a lot of new images. One of the scenes has around 150 images alone. I was hoping to cover more time in this update, but with all the upgrades, that just wasn't possible. Still...as I said, there are a lot of images for this update.

A new HUD was added, along with a money system, and a couple new stats. Old saves from v0.01 will not work.

As I mentioned before, there is a new writer. It took us a while to figure out how to work together, but I think we got it under control now. He's seems to have a good handle on dialog, and I have high hopes that we'll be working together for a long time.

The Chelsea scenes were completely re-done, and the old Sarah scenes will be re-done for the next update. The good thing is that Sarah should be easier to update given that it's the same model, just an update to her hair and aging features.

The alley attack scene was expanded. There are new images in that scene.

The scene after that (when the MC takes Lexi to bed) was moved to a new setting and expanded a lot. The old version was way to intimate for their relationship level. I think the new scene fits much better.

Sound was added. I originally reported on another website that the sound would start on Day2 at the club. That was in error, sound effects do start before the club scene.

Plans moving forward:

I'm hoping to have a good animation or two for v0.03. We have a couple plans that I think you guys will like.

I've been trying to do updates every month. Obviously that didn't happen this time. What I figured out is that I can't keep up with developers like MrDots, and others that do this full time. I have a day job, and I'm in the last year of school. I hope that one day I can do this full time, but until then, I

either have to do smaller updates each month, or take two months for updates. I haven't decided yet what I plan to do, but the opinion of players seems to be split on this. I'll let you know what I decide to do soon.

Well I guess that covers it for now. Have fun!

Day1

Scene: Home from rehab

1. Leave

Scene: Hotel Room

2. Go To Room

3. Call Parker

3. Answer Phone

4. **Ask Her or Not Interested** If you ask Chelsea to have a drink with you, there is a kissing scene in the hotel room later. This also opens a relationship with Chelsea, and a date with extras for the next update. For those expecting to see the sex scene from the demo, I wasn't happy with the quality of the scene even in a higher resolution. It will return in the near future and hopefully will look much better. I also liked the idea of this scene moving to a different location and point in time. Trust me...I'll make it worth the wait.

Scene: Bar and Hotel Room

1. **Lets Go** If the MC keeps drinking, he will pass out and wake up the next day. Additionally the planned date with Chelsea will not happen.

1. Bathroom

2. Go to bed

Scene: Changing

There are no choices in this scene because it is Lexi and Kaylee only. However if you have the extras pack the scene will run longer with some bonus images.

Scene: Pool

1. **Listen In.** Your choice here will determine what scene plays later in this release. If you want to maximize the love and trust points for Lexi, I recommend this route.

The Alley:

There are two possible scenes that could play here, depending on what the player chose at the pool scene.

If the player chose to Listen In at the pool scene, the girls will be rescued before Lexi is traumatized. (+5 Trust, both girls)(+2 Love, both girls)

If the player chose not to listen in, the girls are more traumatized and the player gains less love and trust points. (+1 Trust both girls, +1 Love both girls) However Kaylee gains a certain fetish fantasy (+5 Lust Kaylee)
